DETAILED ACTION

Allowable Subject Matter

1. Claims 1-11 contain allowable subject matter over the prior art of record.
2. The following is an examiner's statement of reasons for allowance:

The claimed invention is directed to a method for manipulating content stored on a disk recorder/playback device using conventional transport commands. The independent claim identifies the feature of "determining which of a set of transport commands has been actuated and to what degree; advancing the content in one of a first and second directions depending on the which of the motion commands has been actuated, while controlling the motion of the content in accordance with the detected control mode and in accordance with the transport command and the degree to which that command is actuated". The closest prior art, Lane et al discloses a conventional video reproducing apparatus including fast forward, rewind or stop commands, either singularly or in combination fails to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Lane et al discloses a conventional video reproducing apparatus including fast forward, rewind or stop commands.

Motohashi et al discloses an image information reproducing apparatus.

Vogel discloses a selective video playing system.

Aggarwal et al discloses performing personal video recording functions on digital video streams.
